ELSEVIER

Volume 370, 17 July 2000

thin solid films

www.elsevier.com/locate/tsf

# Contents

**Letter**

Epitaxial aluminum nitride films on sapphire formed by pulsed laser deposition
S. Six, J.W. Gerlach, B. Rauschenbach . . . . . 1

**Synthesis and Characterization**

Synthetic process of the sol–gel derived $Pb(Zr_{0.53}Ti_{0.47})O_3$ films using poly vinyl butyral binder
Y. Takahashi . . . . . 5

Bias sputtered Ta modified diffusion barrier in Cu/Ta($V_b$)/Si(111) structures
A.Z. Moshfegh, O. Akhavan . . . . . 10

Sputter deposition of NiTi thin film shape memory alloy using a heated target
K.K. Ho, G.P. Carman . . . . . 18

Preparation and characterization of $Bi_2Ti_2O_7$ thin films by chemical solution deposition technique
X.M. Wu, Sh.W. Wang, H. Wang, Z. Wang, S.X. Shang, M. Wang . . . . . 30

Reactive magnetron sputtering of indium tin oxide films on acrylics – morphology and bonding state
J.-L. Huang, Y.-T. Jah, B.-S. Yau, C.-Y. Chen, H.-H. Lu . . . . . 33

Characterization of ultrasonic spray pyrolyzed tungsten oxide thin films
P.S. Patil, P.R. Patil, E.A. Ennaoui . . . . . 38

The microstructure and mechanical properties of TaN/TiN and TaWN/TiN superlattice films
X. Junhua, L. Geyang, G. Mingyuan . . . . . 45

Deposition and photoluminescence of sol–gel derived $Tb^{3+}$:$Zn_2SiO_4$ films on $SiO_2$/Si
H.X. Zhang, C.H. Kam, Y. Zhou, X.Q. Han, S. Buddhudu, Y.L. Lam, C.Y. Chan . . . . . 50

In-situ TEM observations of abnormal grain growth, coarsening, and substrate de-wetting in nanocrystalline Ag thin films
R. Dannenberg, E.A. Stach, J.R. Groza, B.J. Dresser . . . . . 54

Field-emission characteristics of chemical vapor deposition-diamond films
X.L. Peng . . . . . 63

Phase development in pulsed laser deposited $Pb[Yb_{1/2}Nb_{1/2}]O_3$-$PbTiO_3$ thin films
V. Bornand, S. Trolier-Mckinstry . . . . . 70

Dielectric properties of plasma-polymerized diphenyl thin films
F.-U.-Z. Chowdhury, A.H. Bhuiyan . . . . . 78

Submonolayer and single crystal film from ligand-stabilized silver nanoparticles
H.X. Li, M.Z. Lin, J.G. Hou . . . . . 85

Chemical bath deposition of different phases of copper selenide thin films by controlling bath parameters
M. Lakshmi, K. Bindu, S. Bini, K.P. Vijayakumar, C. Sudha Kartha, T. Abe, Y. Kashiwaba . . . . . 89

Microstructure-related resistivity change after chemical–mechanical polish of Al and W thin films
W.-T. Tseng, Y.-L. Wang, J. Niu . . . . . 96

Deposition of tellurium films by decomposition of electrochemically-generated $H_2Te$: application to radiative cooling devices
T. Engelhard, E.D. Jones, I. Viney, Y. Mastai, G. Hodes . . . . . 101

Internal stress and adhesion of amorphous Ni–Cu–P alloy on aluminum
C.-J. Chen, K.-L. Lin . . . . . 106

Tungsten chemical vapor deposition using tungsten hexacarbonyl: microstructure of as-deposited and annealed films
K.K. Lai, H.H. Lamb . . . . . 114

Use of artificial neural networks to predict thickness and optical constants of thin films from reflectance data
M.F. Tabet, W.A. McGahan . . . . . 122

Structural studies and influence of the structure on the electrical and optical properties of microcrystalline silicon thin films produced by RF sputtering
M.F. Cerqueira, J.A. Ferreira, G.J. Adriaenssens . . . . . 128

Preparation and properties of TiN and AlN films from alkoxide solution by thermal plasma CVD method
S. Shimada, M. Yoshimatsu, H. Nagai, M. Suzuki, H. Komaki . . . . . 137

Preparation of $(Ti_{1-x}Al_x)N$ films from mixed alkoxide solutions by plasma CVD
S. Shimada, M. Yoshimatsu . . . . . 146

Deposition and optical studies of silicon carbide nitride thin films
K.B. Sundaram, J. Alizadeh . . . . . 151

Characterization of indium tin oxide film and practical ITO film by electron microscopy
T. Nakao, T. Nakada, Y. Nakayama, K. Miyatani, Y. Kimura, Y. Saito, C. Kaito . . . . . 155

Characterization of titanium dioxide atomic layer growth from titanium ethoxide and water
J. Aarik, A. Aidla, V. Sammelselg, T. Uustare, M. Ritala, M. Leskelä . . . . . 163

Structural and optical properties of yttria-stabilized-zirconia films grown by MOCVD
G. Garcia, A. Figueras, R.I. Merino, V.M. Orera, J. Llibre . . . . . 173

**Surfaces, Interfaces and Colloidal Behaviour**

Cluster diffusion and surface morphological transitions on Pt(111) via reptation and concerted motion
V. Chirita, E.P. Münger, J.E. Greene, J.-E. Sundgren . . . . . 179

Face centred cubic cobalt ultrathin-layers in Au/Co(111) multilayers: a study by electron diffraction and by HREM
S. Jomni, N. Mliki, R. Belhi, K. Abdelmoula, M. Ayadi, G. Nihoul . . . . . 186

Density functional study of silane adsorption onto Si(100) surface
J.S. Lin, Y.T. Kuo . . . . . 192

In situ Fourier transform P-polarized infrared reflection absorption spectroscopic investigation of an interface properties of $SiO_2$/Si(100) deposited using electron cyclotron resonance microwave plasma at room temperature
Y. Jia, Y. Liang, Y. Liu, Y. Liu, D. Shen . . . . . 199

**Metallurgical, Protective and Hard Layers**

Chemical vapour deposition of molybdenum carbides: aspects of phase stability
J. Lu, H. Hugosson, O. Eriksson, L. Nordström, U. Jansson . . . . . 203

Plasma spraying of stainless-steel particles coated with an alumina shell
H. Ageorges, P. Fauchais . . . . . 213

Supertough wear-resistant coatings with 'chameleon' surface adaptation
A.A. Voevodin, J.S. Zabinski . . . . . 223

**Mechanics and Nanomechanics of Thin Layers**

A unified theoretical model for tensile and compressive residual film stress
G. Knuyt, W. Lauwerens, L.M. Stals . . . . . 232

Electric force microscopy study of the surface electrostatic property of rubbed polyimide alignment layers
X. Liang, J. Liu, L. Han, H. Tang, S.-Y. Xu . . . . . 238

**Electronics, Optics and Opto-electronics**

Optical properties of $Er^{3+}$-doped $SiO_2$-$GeO_2$-$Al_2O_3$ planar waveguide fabricated by sol–gel processes
Q. Xiang, Y. Zhou, B.S. Ooi, Y.L. Lam, Y.C. Chan, C.H. Kam . . . . . 243

Fabrication of a new photoelectric conversion system by using a self-assembling technique
J. Zhai, T.-X. Wei, C.-H. Huang . . . . . 248

Dark and photoelectric conversion properties of p-MgPc/n-Si (Organic/Inorganic) heterojunction cells
S. Riad . . . . . 253

Crystal structure of GeTe and $Ge_2Sb_2Te_5$ meta-stable phase
T. Nonaka, G. Ohbayashi, Y. Toriumi, Y. Mori, H. Hashimoto . . . . . 258

Improvement of luminescence efficiency and photostability in polymer thin films
S.M. Lipson, D.F. O'Brien, H.J. Byrne, A.P. Davey, W.J. Blau . . . . . 262

Titanium–aluminum–nitride coatings for satellite temperature control
M. Brogren, G.L. Harding, R. Karmhag, C.G. Ribbing, G.A. Niklasson, L. Stenmark . . . . . 268

**Langmuir–Blodgett: Biological and Related Films**

Surface characterization of the monolayer and Langmuir–Blodgett films of tetra-tert-butyl-copper phthalocyanine
Y.-L. Lee, Y.-C. Chen, C.-H. Chang, Y.-M. Yang, J.-R. Maa . . . . . 278

Vacuum-deposited films of mesogen of 4-*n*-pentyl-4″-cyano-*p*-terphenyl: their electronic spectra and molecular aggregate structures
T. Sumiyoshi, I. Takahashi, Y. Tsuboi, H. Miyasaka, A. Itaya, T. Asahi, H. Masuhara . . . . . 285

An air-stable biomimetic Langmuir–Blodgett bilayer
S. Ryley, A.T. Chyla, I.R. Peterson . . . . . 294

**Thin Film Devices, Sensors and Actuators**

Study of in situ $CdCl_2$ treatment on CSS deposited CdTe films and CdS/CdTe solar cells
P.D. Paulson, V. Dutta . . . . . 299

High temperature cracking of tungsten polycide films on quartz substrate
J. Lee, S.-H. Oh, J. Lee, E. Lee, I. Lim, W.-K. Park, G. Kim . . . . . 307

**Condensed Matter Film Behaviour**

Propagation loss and birefringence properties around 1.55 μm of polymeric optical waveguides fabricated with cross-linked silicone
S. Toyoda, N. Ooba, M. Hikita, T. Kurihara, S. Imamura . . . . . 311

Stress development in FeAl8 thin films during heat treatment
W. Zeiger, W. Brückner, J. Schumann, W. Pitschke, H. Worch . . . . . 315

Author Index of Volume 370 . . . . . 321

Subject Index of Volume 370 . . . . . 323
